SHIVJI RAMESH PRASAD

SOFTWARE ENGINEER II

prasadshiv1998@gmail.com | +91-9810691517 | LinkedIn Profile

Profile Summary

Full-Stack Software Engineer with 4.5+ years of experience building scalable REST APIs, event-driven systems and enterprise web applications using NestJS, Node.js, Express.js, Angular and AWS (Lambda, SQS, SNS, DynamoDB, EventBridge, API Gateway). Experienced in migrating legacy integrations to serverless architecture, designing message-driven workflows and delivering zero-downtime production releases. Also delivered a geospatial web application for **DRDO**-Chandigarh across frontend and backend. Strong focus on clean architecture, performance, reliability and cross-team collaboration.

Technical Skill

- **Languages:** JavaScript , TypeScript
- **Frontend :** JavaScript , Angular , HTML , CSS
- **Backend / Server Side :** Node.js , Express.js , Nest.js
- **Database :** PostgreSQL , MongoDB
- **Cloud / AWS Tools :** AWS Lambda , Dynamodb , SNS , SQS , API Gateway , Cloudwatch
- **Version Control / Devops :** Git

Work Experience

Software Engineer II | Deloitte *11 Aug 2025 - Present*

- Migrated MuleSoft interfaces to NestJS using **AWS** (SNS, SQS, , **Lambda**, DynamoDB), improving scalability and performance through event-driven workflows and reduced dependency on MuleSoft.
- Developed optimized NestJS services and scalable **REST APIs**, refactoring legacy logic with enhanced error handling, structured logging, configuration management, and token-caching using Lambda + DynamoDB to eliminate repeated token API calls.
- Increased system reliability by implementing unit and end-to-end test coverage, and ensured zero-downtime production rollout by closely coordinating with clients and cross-functional teams throughout the migration.

Software Engineer | Infozech Software Pvt Ltd *6 Sep 2023 - 8 Aug 2025*

- Developed billing modules and end-to-end bill generation, improving performance, reliability, and reducing delays in API responses.
- Resolved critical production issues and implemented fixes and enhancements that prevented recurring problems across modules.
- Developed scalable REST **APIs**, including nested object comparison and dynamic form update APIs for UI-driven configuration changes.
- Designed dynamic, configurable Angular screens and forms to support multiple business scenarios without code changes.

Full Stack Developer | Simultaneous Geographical Reality Labs *2 May 2022 - 5 Sep 2023*

- Contributed to a geospatial web application for **DRDO**-Chandigarh, working across frontend and backend.
- Implemented Node.js REST APIs and backend services for geospatial data access and processing.
- Enhanced the map UI using OpenLayers and developed geospatial analysis features (e.g., intersection counts between rays).
- Collaborated with designers and stakeholders to convert domain requirements into reliable features.
- Performed testing, debugging, and performance tuning to ensure accuracy of geospatial outputs.

Education

Noida International University *2016-2020*

Bachelor of Technology (B.Tech) in Computer Science and Engineering
